Art Unit: 1654

## DETAILED ACTION

## Election/Restrictions

1. Claims 1-18 generic to a plurality of disclosed patentably distinct species comprising a parachute structure and therapeutic compound. The structure has parachute structure linked to a therapeutic compound using a spacer. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed. That is, in order to achieve a single disclosed species, Applicants are requested to elect a single disclosed component of each part of the complex. Thus, Applicants should elect a single disclosed parachute structure, a single disclose spacer, and a single disclosed therapeutic compound.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Anish Gupta whose telephone number is (703) 308-4001. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Brenda Brumback, can normally be reached on (703)306-3220. The fax phone number of this group is (703) 308-4242.
